

Technology Updates

2023-2024

Network Changes

Over the summer we have changed the network infrastructure works for our district. The changes should be invisible to most users but will increase our security and stability.

New Phone Company

We have replaced our Grand-stream phones with Yealink phones.

These systems use the network cable to provide power.

Our Internet provider will provide all phone services instead of the technology department.

Default VM password: 4028

Logging In

Our system is now integrated with both Microsoft and Google with your @unicoischools.com address. When you login you will be sent to a Microsoft login page. You can login and it will authenticate you for both Microsoft Office and Google.
